RE: STATE CONTROLLER'S OFFICE - 21ST CENTURY PROJECT UPDATE MEETING

We are happy to announce the 21st Century Project has reached another major milestone! As you know, over the last two years the project has been engaged in a split procurement process for a new software product and the services of a System Integrator. Last May an Interim Agreement was signed with SAP Public Services, Inc. (SAP) for the new software, and on March 13, 2006, the Department of General Services released a Notification of Intent to Award to BearingPoint, Inc., for the system integration services. It is anticipated that final contracts with the SAP and BearingPoint will be signed in May 2006. The next major activity is project start-up, which is anticipated to also begin in May 2006.

Because of the impact on state operations, the Department of Personnel Administration and the State Controller's Office invite you to attend the 21st Century Project Update Meeting:
